League: BNR IROC
Season: BNR IROC Season 1

This is the screen where we get some work done!

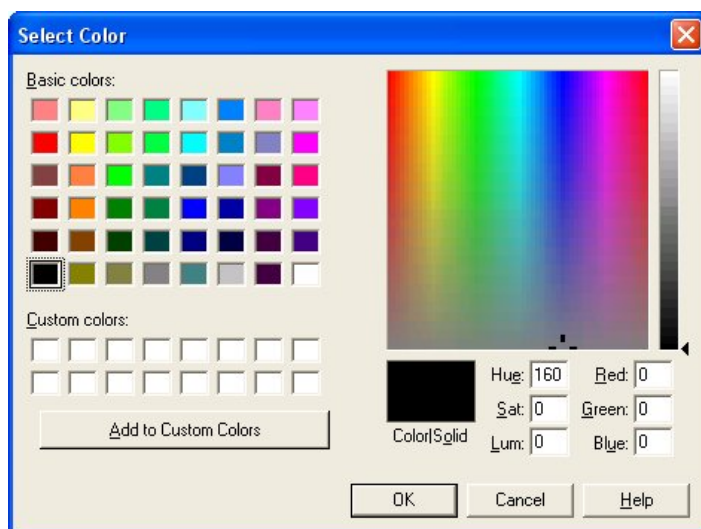

Lets go down the list and find out what this screen does:

- Web Site Home Page - Enter your home page here and each exported page will have a link back to home. Leave it blank if you don't want a link to your home page.
- Logo Image - Enter the **WEB PAGE** address to the logo you want on top of each page. Use relative addressing if you know what that is. Leave it blank if you don't want to use a logo.
- Background Image - Again, use the web page address of the background image you want to use. Leave it blank if you don't want a background.
- Time Based Exports - Select this if you want the qualifying events to be shown as a time instead of a speed.
- Export Path (required) - Enter the path on your hard drive that you want the program to put all the .html files it's going to create.
- Export Check Boxes (lower right of screen) - Use these to turn on/off various parts of the export.

ALL CHANGES ON THIS SCREEN ARE TEMPORARY. Make permanent changes on the League screen.

Color Buttons and Fonts

Clicking on the color buttons in the lower left of the screen will bring up the following dialog box:

Select the color you want to apply to that element and click ok. The color change will be reflected on the color button.

Click on the **ABC** button to open a similar screen for selecting the font. PLEASE NOTE: Not all fonts are supported by all computers and/or browsers. Change the font at your own risk.

Click on the **Write Standings** button to begin the exporting process. After the export is finished, you will be given a message and the export screen will close.
